

SKYSENSE AS

SkySense AS combines two essential flight instruments—anemometer and altimeter—into a sleek, ultra-thin design. Available in 57mm and 80mm sizes, SkySense AS fits seamlessly into your ultralight aircraft's dashboard, delivering precision and convenience without compromise.

SkySense AS57

SkySense AS80

What it offers:

Tape or drum Altimeter, VSI, ASI, TAS (with optional probe), each indication can be configured with the main units of measurement.

SkySense AS is more than an instrument—it's your flight companion designed to enhance your flying experience by delivering precise, immediate data in a compact, elegant package. Choose safety, convenience, and innovation for your ultralight aircraft.

Why choose SkySense AS?

Full customization: User-configurable scales and units allow you to tailor the instrument to your specific flying needs and preferences.

Free **pre-configuration** of the instrument is available **upon request**.

Advanced features: TAS (True Airspeed) and Airspeed provide reliable data for safe and accurate navigation.

Reliability and safety: The self-diagnostic system continuously monitors instrument health, minimizing risks and unexpected issues during flight.

CAN BUS connectivity: Easy integration with other avionics systems onboard, creating a modern and functional cockpit.

Reading comfort: Auto dimmer, Anti Glare TFT display and a 280° smart scale ensure optimal visibility in all lighting conditions, from bright sunlight to twilight.
